

Wire Frames Ideas

1. Gliffy: Gliffy is a great website for designing diagrams, wireframes, charts and other things. It's easy to use. They provide tutorial videos to show you how to use the tools. They provide a outline idea for you to begin with and you can change what you want. I think this was a pretty cool site overall.
2. Wireframe.cc: Another great tool to create wireframes. It's more simple and easy to use. They also provide a tutorial video to help you. There were simple tools to help you create your wireframe. Even though its basic but it gets the job done of making a wireframe.
